Part III REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The prior art of record does not teach, disclose, or suggest the claimed limitations of (in combination with all other limitations in the claim), a multiple function apparatus comprising a first transporting guide being formed to transport a first sheet; a second transporting guide provided along the first transporting guide including a straight guide and a deflecting guide part, the straight guide part being formed so as to transport a second sheet straight, and the deflecting guide part being connected to the straight guide part so as to transport a second sheet in a direction in a direction different from a direction of transport effected by the straight guide part , and a second apparatus provided at the straight guide part, and performing processing for the second sheet in a case where the second sheet is transported along the straight guide part; wherein the first transporting guide is provided opposite a direction of deflection effected by the deflecting guide part with respect to the straight guide portion and the deflecting guide part is disposed over the first apparatus; wherein a direction of transport of the first sheet effected by a portion of the first transporting guide which faces the straight guide part of the second transporting guide and a direction of transport of the second sheet effected by the straight guide part for an angle smaller than 90 degrees with the vertical direction in a case where the multiple function apparatus is provided for use as claimed in claim 1. Similar features are claimed in claim 11. Therefore, claim 11 is allowable over the prior art of record for the same reasons.
